Trans. d[Deutsche] K[eramische] G[esellschaft]. Ber-
[lin] (West Germany) 1954, v. 31, no. 12, p. 404-409.DESCRIPTORS: "Ceramic coatings, Metal oxides, In-
dustrial production, Economics.

The cost of production of white glazes is determined by the kind of opacifier employed. Examples are given. The principle of white opacity is explained. Opacity can be classified under three types: (1) the opacifier does not dissolve in the glaze. (2) the dissolved opacifier separates out again or separation is present. (3) gaseous opacity. The various industrial opacifiers are discussed from the standpoint of how the composition of (Materials--Ceramics, TT, v. 7, no. 9) (over)
